Poldina reverso _Table

Poldina Reverso is a rechargeable battery-powered cordless table lamp, with a multipurpose storage tray. A "touch" control smartly placed on the lower part of the head allows switching on/off, dimming, and selecting the color temperature of the light (2200 K, 2700 K or 3000 K). It is suitable for both indoor and outdoor use. The multipurpose container tray (capacity 18cl) in thermoplastic resin suitable for food contact (PET) is removable and reusable. An electronic control system monitors the remaining autonomy and ensures a constant luminous flux until the battery runs out. Recharging is therefore optimized and always properly done. The lamp comes with a contact charging base; battery charger included. Poldina Reverso can be customized with a ceramic cover, to be purchased separately
