

Poldina _Lamp with peg

Poldina is a rechargeable battery-powered cordless lamp with peg. A "touch" control on the head allows switching on/off, dimming, and selecting the color temperature of the light (2200 K, 2700 K or 3000 K). It is suitable for both indoor and outdoor use. An electronic control system monitors the remaining autonomy and ensures a constant luminous flux until the battery runs out. Recharging is therefore optimized and always properly done. The lamp comes with a USB Type-C cable for recharging; the battery charger is included. It can be customized with a ceramic cover, to be purchased separately (pg. 54). Additional stem extensions are available as accessories to increase the height of the lamp (to be purchased separately).
